

Off-Site Recycling/Disposal Form 1999

Permit number(s) _____

Make copies of this page as needed.

Provide one off-site recycling/disposal form for each waste stream at your business location.

A waste stream is the liquid waste from one or more processes mixed together to make one liquid waste product before it is taken off site for recycling, disposal or combustion.

- 1) Assign a unique two-digit ID number to identify the waste stream that will be described below. _____
(Start with ID# 1 for first waste stream then use 2 for second, etc.)
- 2) How many gallons of liquid waste did this waste stream produce in 1999? _____ gallons.
Keep waste disposal company manifests as proof that this amount of liquid waste was taken off site.
- 3) What was the **average** pollutant content of the liquid waste stream? Keep waste disposal company or lab records as proof.
VOC _____ lbs/gal HAP&NON _____ lbs/gal NHx _____ lbs/gal
- 4) Calculate the total annual pollutant content of the liquid waste in this waste stream.
(volume of liquid waste, from line 2) x (pollutant content, from line 3) = Total pollutants in waste stream, in lbs/yr.
VOC _____ lbs/yr HAP&NON _____ lbs/yr NHx _____ lbs/yr
- 5) List the process ID numbers of the processes contributing to this waste stream. Also estimate the pounds of pollutant that each process contributed to this waste stream.

NOTE: Column totals in the table below must equal the total for each pollutant type reported on line 4. The quantities you report below for each pollutant and process must also be reported in column 13 on the Evaporative Process Form. See the instructions for an example of a completed Off-Site Recycling/Disposal Form.
